Interdisciplinary Graduate Program in Immunology
Immunology First-year Student Rotation Presentations

Signaling Differences Between CD40 and its Viral Mimic LMP1: The Role of the TRAF Binding Site
John Graham (Bishop Lab)

IgE Production and B Cell Viability During the Germinal Center Response
Alex Boyden (Waldschmidt Lab)

Activation of gamma/delta T Cells by the Virally Induced Protein, Viperin
Kristin Ness (Morita Lab)

Molecular Determinants for Activation of the Toll-Like Receptor 4 Signaling Pathways
Greg Esparza (Weiss Lab)

Analysis of a Mutant GPI Bond MHC I Decoy Ligand
Tyler Ulland (Heusel Lab)

Justy, a Novel Mouse Gene Required for B Cell Development
Ming-Yi Chiang (Colgan Lab)

May 16, 2007
Wednesday  4:00 - 5:00
283 EMRB
